

3C's BLOCKCHAIN

② create a C3 Ticket

CIA or CIB

C3 Blockchain

→ mobile, after securing coverage plan confirmation
CREATES A TICKET on C3

TICKET

- Car Accident (multiple)
- Car accident (alone)
- Fire
- death
- etc.

→ scans a QR Code on participating policy holder's mobile phone(s)

→ The new C3 Ticket^{tt} is then shared w/ all Applicants like a "New" message or TABLE on their mobile APP

→ Policy holders are then asked to upload ID's, pictures and their

own account of the accident

→ Policy Holders are then asked if they are the main "culprit" of the accident

→ FNOL is created and the insurance companies are notified

→ Policy Holders are then updated and advised on C3 on the current status

STATUS

- FNOL created
- Claim Review
- Claim Processed
- Done
